

SAINT RABOR

Fullstack Developer

Cagayan de Oro City, Philippines | 0997 355 8878 | saintstraborrr@gmail.com | linkedin.com/in/saint-rabor18 | st.saintstraborrr.workers.dev

PROFESSIONAL SUMMARY

Fullstack Developer with 2+ years of experience building and maintaining production web applications across the full stack. Skilled in React/Next.js and TypeScript on the frontend, and Rust, Django, and Node.js on the backend, with working knowledge of PostgreSQL, MySQL, and Docker. Experienced in Microfrontend (MFE) architecture, API integration, and collaborating within enterprise client teams to deliver scalable, maintainable software.

WORK EXPERIENCE

UI/UX Developer / Frontend Developer <i>Outsourced Personnel via CyTech International — embedded under NSP's management structure</i> - Developer focused on UI/UX improvement for the Quality Cockpit (QC) system, working across multiple subsystems alongside a Japanese client team. - Transitioned from the NSP Employee Portal project into the QC team, contributing through GitLab-based merge request workflows across the Maintenance, Benchmark, Search, Karte, and Alert Email repositories. - Collaborate directly with NSP's technical leadership on requirements and UI/UX standards, operating within the client's own reporting structure independent of CyTech.	May 2026 – Present
Fullstack Developer - Architected and led development of a Microfrontend (MFE) system for a core company product, enabling independent deployments and improving long-term scalability. - Built and maintained backend services with Rust and Django, integrating PostgreSQL and MySQL databases through Drizzle ORM. - Reduced technical debt by 25% by introducing an Agent-based coding workflow and leading code reviews across the team. - Designed and shipped 'Sniff and Detect,' an Outlook extension that automated recurring workflow tasks for 50+ employees. - Used Docker and Git in day-to-day development for containerized local environments and version control.	Dec 2024 – May 2026
Web Developer - Delivered features across the full software development lifecycle for production-grade applications, with a focus on API integration and performance. - Enforced SOLID principles, OOP, and Clean Code standards across the team's codebase through peer code reviews.	Feb 2024 – Dec 2024
Intern Web Developer Assisted senior developers with debugging, testing, and documentation, gaining hands-on exposure to production development workflows.	Dec 2023 – Feb 2024

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, HTML5, CSS3, Flutter
Backend: Rust, Node.js, Django, RESTful APIs, PostgreSQL, MySQL, Drizzle ORM
Architecture: Microfrontend (MFE), SOLID Principles, OOP, Clean Code
Tools & DevOps: Docker, Git, Agile/Scrum, CI/CD

SOFT SKILLS

Cross-functional Collaboration, Mentoring & Peer Guidance, Cross-cultural Communication, Problem-Solving, Adaptability, Ownership & Accountability, Attention to Detail

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Technology

Cagayan de Oro College — 2024

EF SET English Certificate — B2 Upper Intermediate (55/100)
